

Q. 537 div. by 6

Example:

$$\begin{array}{r} 537 \\ \underline{300} \quad - 50 \times 6 \\ 237 \\ \underline{180} \quad - 30 \times 6 \\ 57 \\ \underline{54} \quad - 9 \times 6 \\ 3 \end{array}$$

$$50 + 30 + 9 = 89$$

Ans: 89 rem 3

Chunking Division

This method involves removing sizeable chunks from your main number to find your answer.

Using the example to your left have a go at this method.

1. $153 \div 6 =$
2. $184 \div 4 =$
3. $271 \div 7 =$
4. $393 \div 8 =$
5. $628 \div 9 =$
