

Friday 15th May – Reading Activity Year 1

Read the rest of the story from yesterday and answer the questions below.

The rocket didn't move - what was up with it? They got out and had a look around. Hmm...was it this? Or was it that? They looked all around when, suddenly, the rocket started to move a little. Quickly they went back inside and sat down. The rocket flew up into the dark night sky. Soon, all they could see was the Earth below them, but now it was a very small blue and green ball. They could see the giant yellow sun and many small white stars. Oh my, it was great to see space at last, they said!

1. What happened when they started the engine?
2. What did earth look like from the rocket?
3. Write the two words used to describe the sun.
4. How do you think they felt when they blasted off?

Answers:

1. What happened when they started the engine? **The rocket didn't move.**
2. What did earth look like from the rocket? **Like a small blue and green ball.**
3. Write the two words used to describe the sun. **giant, yellow**
4. How do you think they felt when they blasted off?
