

**Year 2**  
**Patterns of 2D Shapes**

Complete the patterns.

A. 

								
---	---	---	---	---	--	--	--	--

B. 

								
---	---	---	---	--	--	--	--	--

C. 

								
---	---	---	---	---	--	--	--	--

Match the patterns to the descriptions to find the  
odd one out

A. 

					
---	---	---	---	---	---

B. 

All the shapes are pentagons.
----------------------------------

C. 

				
---	---	---	---	---

D. 

All the shapes have fewer than 4 sides.
--

E. 

					
---	---	--	---	---	---

Create a repeating pattern using the instructions below.

**The completed pattern must be 10 shapes long.**

**It must include circles and squares.**

Year 2  
Patterns of 2D Shapes

Complete the patterns.

A and D match; B and C match; E is the odd one out.

A.

B.

All the shapes are pentagons.

C.

D.

All the shapes have fewer than 4 sides.

E.

Create a repeating pattern using the instructions below.

Various answers, for example:

**Year 2**  
**Patterns of 2D Shapes**

Complete the patterns.

A. 

								
---	---	---	---	---	--	--	--	--

B. 

								
---	---	---	---	---	--	--	--	--

C. 

								
---	--	---	---	---	--	--	--	--

Match the patterns to the descriptions to find the  
odd one out.

A. 

					
---	---	---	---	---	---

B. 

triangle, square, pentagon, triangle, square, pentagon
--

C. 

					
---	---	---	---	---	---

D. 

triangle, square, pentagon, triangle, square, pentagon
--

E. 

triangle, pentagon, pentagon, triangle, pentagon, pentagon
--

Create a repeating pattern using the instructions below.

The completed pattern must have 12 shapes in  
total.

There must be 3 different shapes in the pattern.

There must be 6 rectangles in the completed  
pattern.

## Year 2 Patterns of 2D Shapes

Complete the patterns.

A and B match; C and E match; D is the odd one out

A.

B.

triangle, square,  
pentagon, triangle,  
square, pentagon

C.

D.

triangle, square,  
pentagon, triangle,  
square, pentagon

E.

triangle, pentagon,  
pentagon, triangle,  
pentagon, pentagon

Create a repeating pattern using the instructions below.

Various answers, for example:

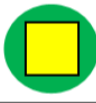

## Year 2 Patterns of 2D Shapes

Complete the patterns.

A. 

								
---	--	---	---	---	--	--	--	--

B. 

								
--	---	---	---	---	---	--	--	--

C. 

								
---	---	---	---	--	--	--	--	--

Match the patterns to the descriptions to find the odd one out.

A. 

					
---	---	---	---	---	---

B. 

					
---	---	---	---	---	---

C. 

					
---	---	---	---	---	---

D. 

All the shapes in this pattern are hexagons.
--

E. 

There are 2 different pentagons in this pattern.
--

Create a repeating pattern using the instructions below.

The completed pattern must have 12 shapes in total.

There are 4 repeats within the pattern.

It must only have one kind of shape in different orientations.

## Year 2 Patterns of 2D Shapes

Complete the patterns.

A and E match; B and D match; C is the odd one out.

D. 

All the shapes in this pattern are hexagons.

E. 

There are 2 different pentagons in this pattern.

Create a repeating pattern using the instructions below.

**Various answers, for example:**
