

ROLL

CALCULATE

COLOUR

This is like connect four. You need to roll a dice – if you don't have one at home click on this link for a virtual one

<https://nrich.maths.org/virtualdice/responsive.html> – choose a number to multiply it by and work out the answer. If the answer is on your grid colour it in. The aim is to try and get 4 numbers in a row. See if you can work out what times tables are included in the grids below. The first grid is the easier of the two. Good luck!

	10	16	40	24	
12	2	20	8	10	24
6	16	48	12	8	32
24	8	32	8	4	12
4	20	2	40	16	12
	4	16	24	48	

	45	18	15	36	
24	12	24	27	54	18
6	18	3	18	15	30
9	6	12	36	12	9
12	18	36	54	36	6
	45	9	30	27
