Place Value

Using the link find the pairs – each number needs to be matched with the digit.

<https://learnenglishkids.britishcouncil.org/archived-word-games/find-the-pairs/numbers-1-10>

As you read a word you could write down the number you are looking for.

Green

- Ask an adult to write a selection of numbers on some post-its or pieces of paper. Initially 0-10 extend beyond 10 if your child is confident.
- Create a display of what that number looks like.
 - ❖ Write out the number as a word
 - ❖ Find an object of that many
 - ❖ Can you find the correct number of objects to make that number?
 - ❖ Find the number on a measurement

E.g. – the number 5 written on the post-it

I write out five (as a word)

I find 5 paperclips

I use 5 pencils to make the number 5

I find 5 on the tag in my school jumper

Yellow

- Ask an adult to say a number 0-30 and create a display of what that number looks like.
 - ❖ Write out the number as a word - sixteen
 - ❖ Write the number as a digit - 16
 - ❖ Find an object of that many – 16 books
 - ❖ Can you find the correct number of objects to make that number? – 16 grapes arrange to show the number 16
 - ❖ Find the number on a measurement – 10.16 on the clock
 - ❖ Show the number using tens and ones – a packet of ten biscuits and 6 individual biscuits.
-

Red

- Using the word mat answer the following questions to write the correct numbers with the correct words.

Match the correct digit to the correct word

34

eight

15

nineteen

8

thirty-four

19

twenty-two

22

fifteen

Write the correct digit next to the words

Twenty-five _____

Seven _____

Thirty-eight _____

Sixteen _____

Twelve _____

What am I?

Play this game with a partner

Take turns to think of a number and invite your partner to ask you up to 5 questions about that number. They must write down their answer using words not digits to show you. Were they correct?

Use the word mat to help with spellings.
