

## Maths

Thursday - 25<sup>th</sup> June 2020

### Place Value

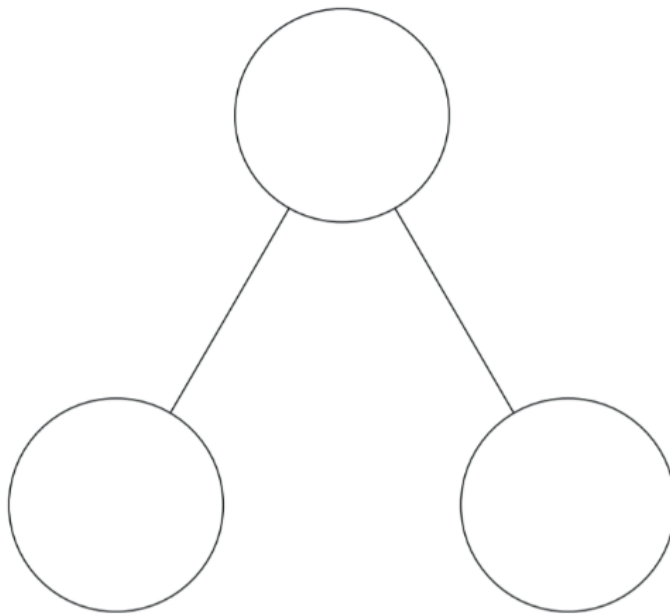

Using the link, work out the number which has been partitioned.

<http://www.ictgames.com/sharkNumbers/mobile/index.html>

Be careful not to get eaten by the shark.

### Green

- Partition the teen numbers into tens and ones using the template below – which can be drawn out.

Add the teen number into the circle at the top.

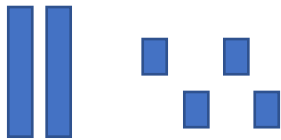

Work out how many tens and how many ones and place those numbers in the respective circles below.

---

## Yellow

- Work through the partitioning PowerPoint. Can you correctly partition the numbers?
- Select some of your own numbers 0-50 and partition them accurately using tens and ones.
- Draw a picture to represent how the number would look in pictorial form.

24 -> 20 and 4 -> 2 tens and 4 ones

---

## Red

- Complete the challenge – The Place Value Mystery in the Palace Kitchen.
- The document can be downloaded – you do not need to print it off but you can if you would like to.
- There are 5 clues to solve below working out who the secret nibbler is. It is planned to be continued tomorrow so you do not need to rush.
- The answers can be found at the end of the document.
