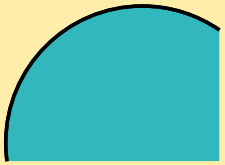
Shapes

The properties of 2D shapes

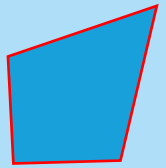
Properties of 2D Shapes

Take a look at some of the language used to describe the properties of 2-dimensional (2D) shapes below:



curved

longer

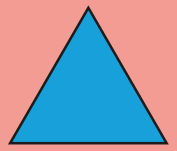


sides

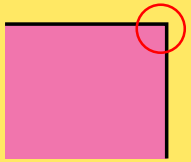
straight

shorter

2-dimensional



equal

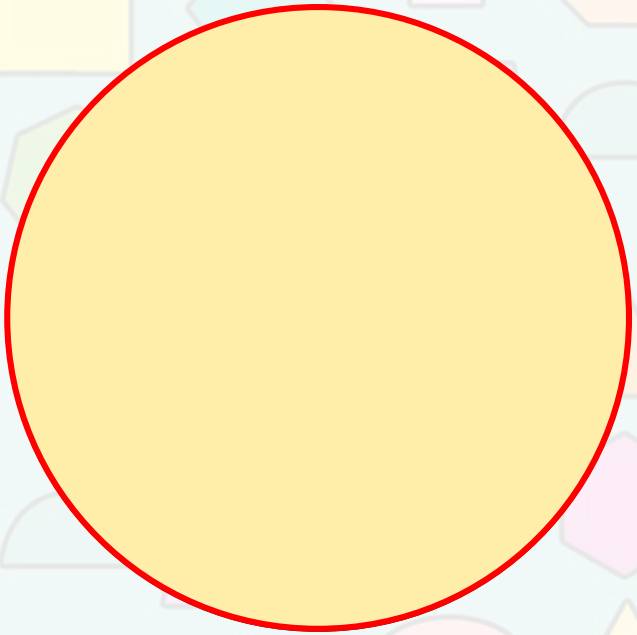


corner

length

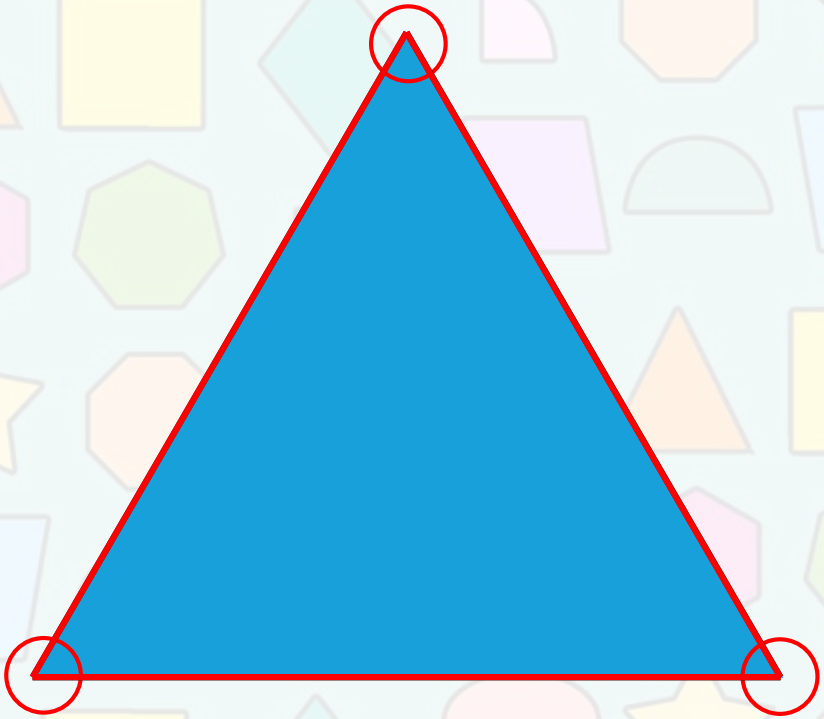
circle

How many curved sides?	1 curved side
How many corners?	0 corners



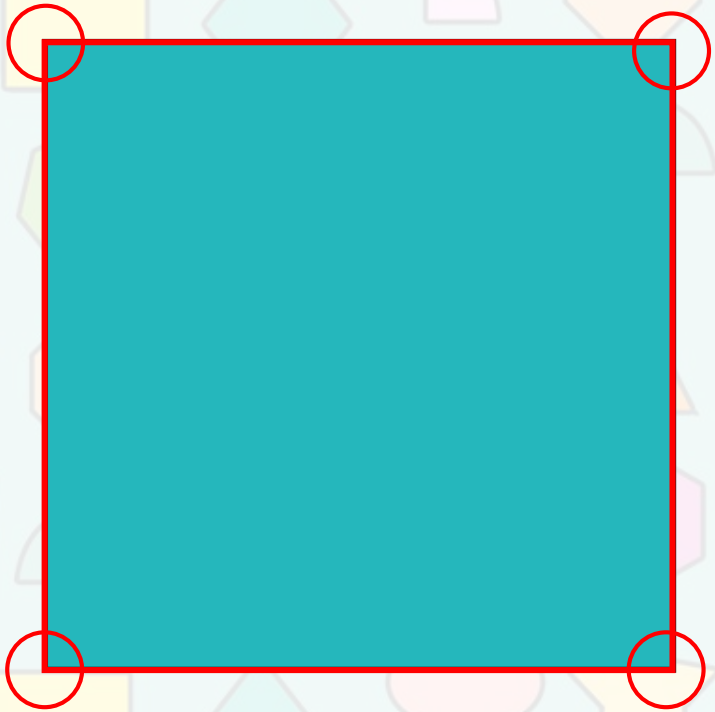
triangle

How many straight sides?	3 straight sides
How many corners?	3 corners



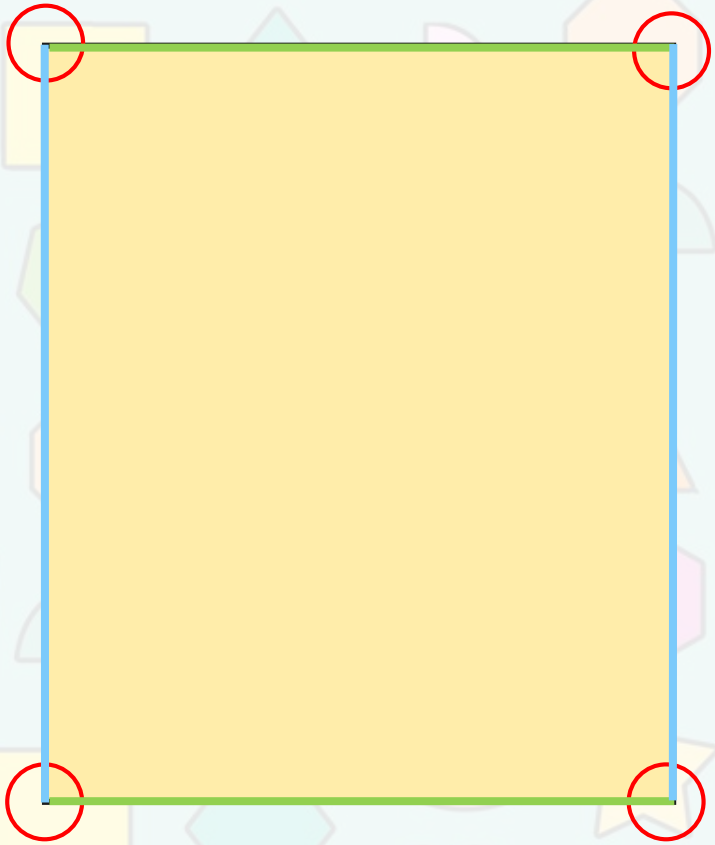
square

How many straight sides?	4 straight sides 4 equal length sides
How many corners?	4 corners



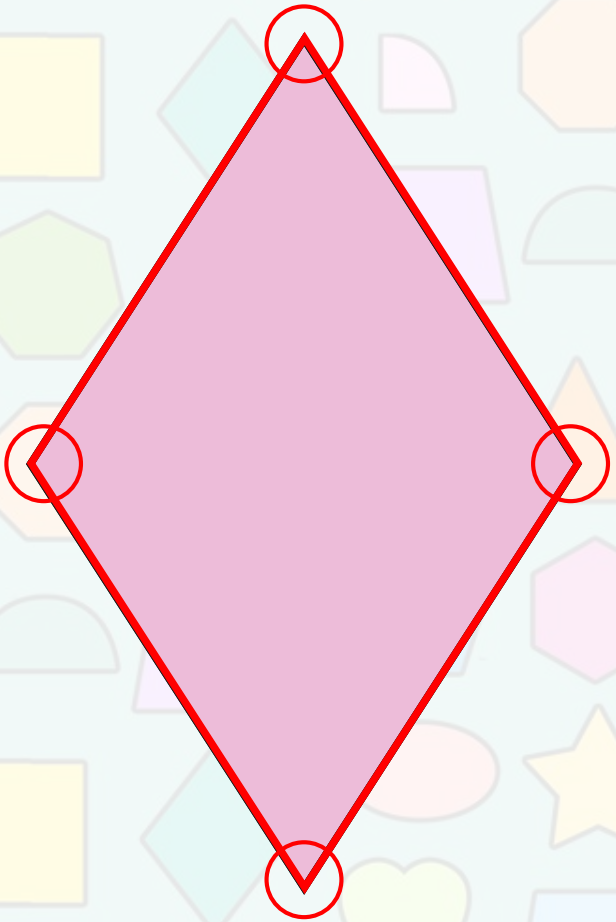
rectangle

How many straight sides?	4 straight sides 2 long sides 2 short sides
How many corners?	4 corners



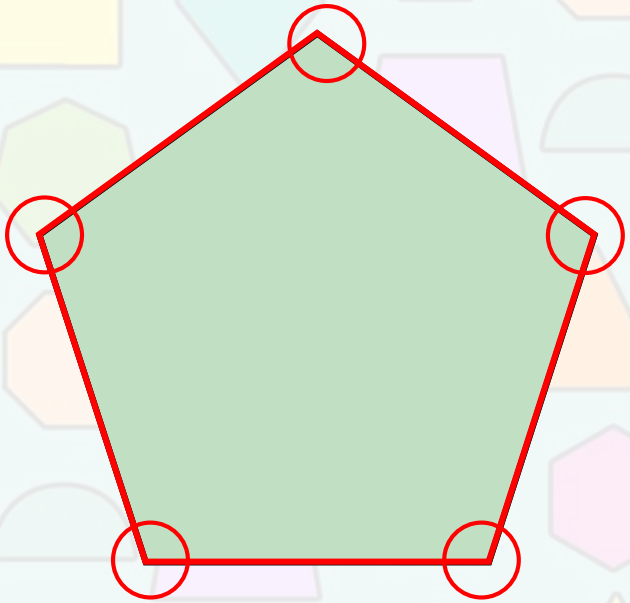
rhombus

How many straight sides?	4 straight sides 4 equal length sides
How many corners?	4 corners



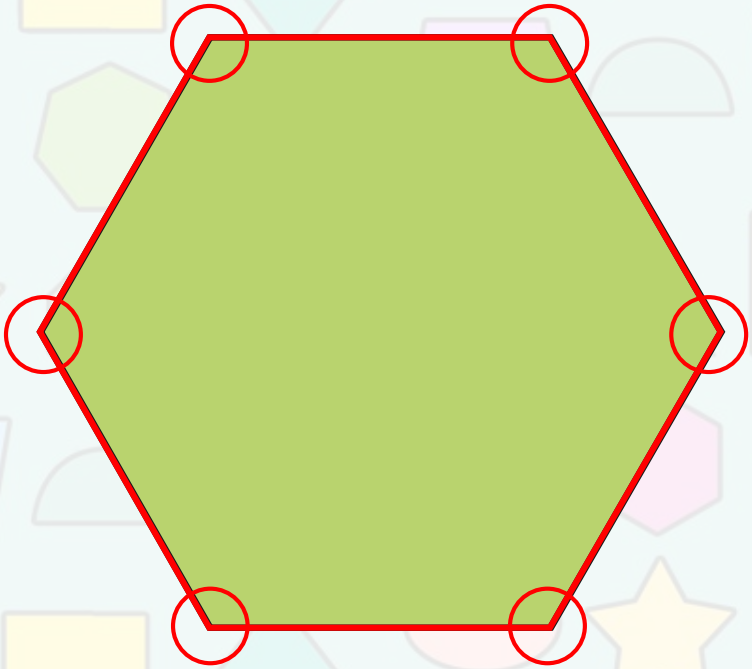
pentagon

How many straight sides?	5 straight sides
How many corners?	5 corners



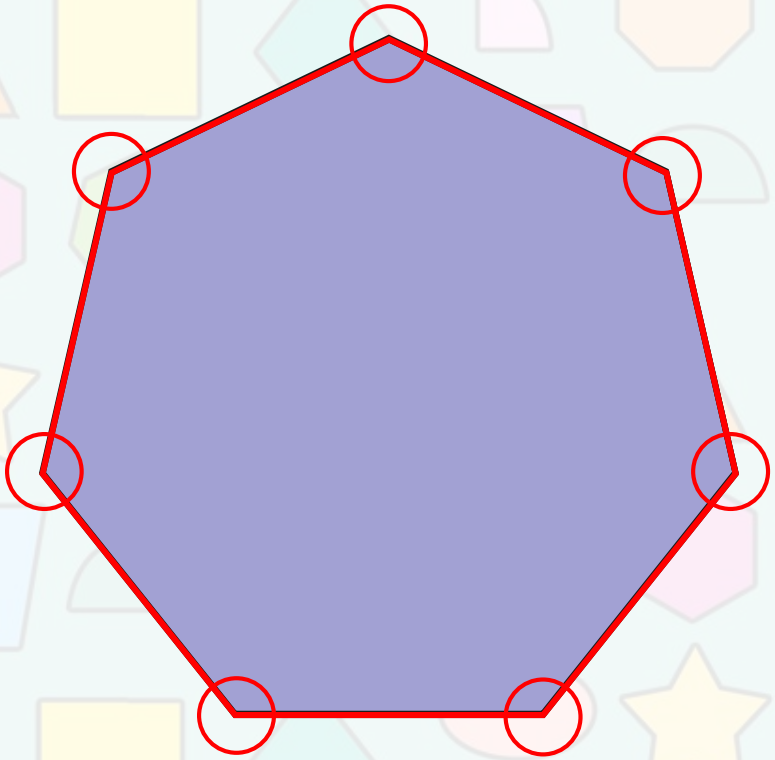
hexagon

How many straight sides?	6 straight sides
How many corners?	6 corners



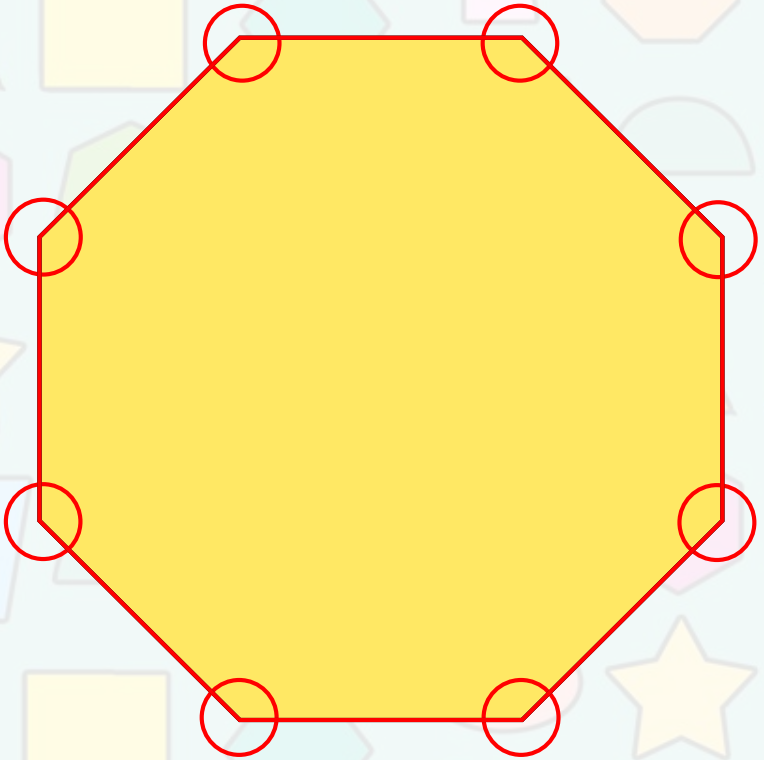
heptagon

How many straight sides?	7 straight sides
How many corners?	7 corners



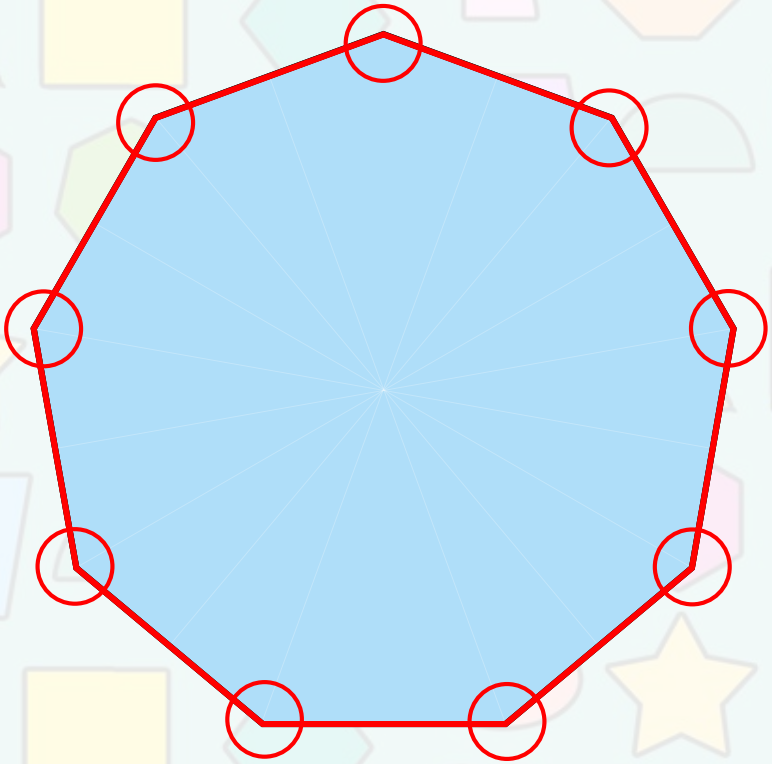
octagon

How many straight sides?	8 straight sides
How many corners?	8 corners



nonagon

How many straight sides?	9 straight sides
How many corners?	9 corners



decagon

How many straight sides?	10 straight sides
How many corners?	10 corners
